UNICHEM
INDUSTRIAL & ENGINEERING SERVICES

NCF series

Low-solids, no-clean wave soldering flux.

Made in Egypt by Unichem for PCB manufacturers. Solder with minimal residue and leave out the post-solder cleaning step.

Low solids

Leaves minimal residue on the board after soldering.

No clean

Designed to be left on the board, with no post-solder cleaning stage.

Made in Egypt

By a company with 30+ years in the Egyptian industrial market.

Supplied to PCB manufacturers. Talk to our technical team about fitting NCF series into your wave soldering line.

UNICHEM
INDUSTRIAL & ENGINEERING SERVICES

WAVE SOLDERING FLUX
FOR PCB MANUFACTURERS

WHY NCF series

Less residue and one less step on your line.

Low solids

A low-solids formulation leaves minimal residue after the solder wave.

No-clean

Designed so boards can go on without a post-solder cleaning stage, saving time, water and chemicals.

Made for wave soldering

Formulated for wave soldering lines in PCB manufacturing.

Local supply and support

Manufactured in Egypt, backed by our engineers and 30+ years of industrial chemistry experience.

WHERE IT FITS ON YOUR LINE

Flux application: NCF series → Preheat → Solder wave → Cooling →

No cleaning needed

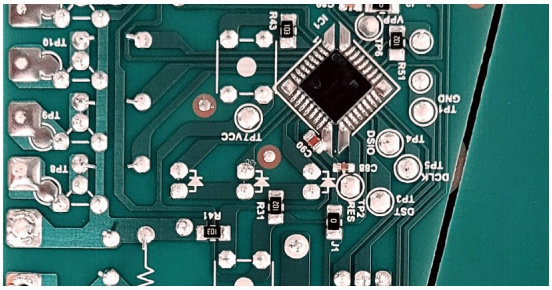
PRODUCT DATA

NCF series at a glance.

Product	NCF series
Type	Low-solids, no-clean soldering flux
Application	Wave soldering of PCBs
Origin	Made in Egypt by Unichem
Appearance	*pale yellow*
Solids content	*3 - 5 % depend on the application*
Density	*805 g/L*
Packaging	*25 liters / approximately 20kg jerrycan*
Shelf life	*12 months*

Handling and storage

Flammable material.
Keep away from direct sunlight and flame sources.
Store in the original closed containers.



Talk to our technical team

Tell us about your wave soldering line and we will help you introduce NCF series.
